## Delta Wireless Remote Pairing

**Affected Product:** Delta Systems (E-1000 Delta Controller).

**Wireless Pairing:**

1. Press and hold "Code" button on the main keypad, indicated by one red flash initially (Red), followed by a continuous blue light. (Blue).

*Note: there are two versions of remote with same function but different orientation which are Vertical and Horizontal Remote as above images.*

**Vertical Remote**

**Horizontal Remote**

2. Press blue "UP" button on the remote three times. The main keypad on the controller should flash all three lights twice (Yellow + Red + Blue). (Yellow, Red, Blue). This indicates the remote is now keyed.

*Note: If the lights on the main keypad do not flash, then repeat STEP 1 and 2.*

### Wireless Unpairing:

To unkey the wireless remote, simply press and hold the blue "code" button (10 seconds approximately) on controller, indicated by a solid blue light (Blue). After the blue light illuminates, keep holding the "code" button until all three lights flashing three times (Yellow + Red + Blue), then release the button.
